## INFORMATICS ENGINEERING

---

Fullstack Developer with strong experience in web and mobile application development, specializing in Laravel, CodeIgniter, React JS, Flutter, Node.js, and ASP.NET. Proven ability to build scalable systems, integrate APIs, optimize application performance, and deliver maintainable code. Experienced in developing academic, institutional, and financial systems, with a strong focus on problem-solving, system reliability, and collaboration across technical and business teams.

## RECENT PROJECTS

---

### SiPINTAR

<https://play.google.com/store/apps/details?id=com.uhamka.sipintar&pli=1>

Developed a cross-platform mobile application using Flutter, implementing responsive UI, state management, and core application logic, with content integration and performance optimization to support nutrition literacy initiatives at UHAMKA.

### Opac Jurnal Perpustakaan UHAMKA

<https://ojp.uhamka.ac.id/>

Developed a web-based journal search system integrated with an AI chatbot using Laravel and Flowise AI, improving journal accessibility and research efficiency for UHAMKA students through optimized performance and scalable architecture.

### Teknoka

<https://teknoka.uhamka.ac.id/>

Developed and maintained the TEKNOKA web platform for UHAMKA's national conference using CodeIgniter, supporting journal submission, review, and publication with improved performance and system reliability.

### Pencarian Mahasiswa Lampau

<https://mbkm-lldikti3.kemdikbud.go.id/nirm/>

Developed a student data search system for LLDikti Region III Jakarta using the Laravel framework, designed to help staff efficiently validate student records as part of the graduation verification process.

## PROFESSIONAL EXPERIENCE

---

### FrontEnd Developer at PT. Bank Muamalat Indonesia

Nov 2025 - Present

Developed the Microsite COB (Customer Onboarding) interface using React JS and integrated backend APIs to support the digital account opening process. Performed bug fixing, debugging, and code refactoring to improve application performance and stability, while collaborating with backend teams and relevant stakeholders.

### Fullstack Developer at PT. Daya Medika Pratama

Oct 2025 - Oct 2025

Improved and maintained ASP.NET APIs, integrated .NET systems with third-party services, and developed scalable microservices using Node.js. Optimized SQL Server stored procedures to enhance performance, reliability, and system efficiency.

### Back End Engineer Teknoka 8 & 9

Sep 2023 - Nov 2024

Contributed to the development of the TEKNOKA web platform using CodeIgniter, improving system performance, reliability, and user experience. Enhanced database efficiency, optimized website speed, and collaborated with the team to refine UI/UX and key journal submission features.

**Application Developer intern at LLDikti Wilayah III****Feb 2024 - Jun 2024**

Developed and maintained multiple information systems for LLDikti Region III Jakarta, including a student data validation system, a university map application, and a legacy student search platform for pre-2003 graduates. Redesigned and deployed the Pevita login system to improve accessibility and support institutional data verification processes.

**EDUCATION**

**Universitas Muhammadiyah Prof. Dr. Hamka (UHAMKA)****Aug 2021 - Aug 2025**

Bachelor of Informatics Engineering — GPA: 3.66 / 4.00

**CERTIFICATIONS**

HTML5 Application Development Fundamentals — Microsoft
